

Koen Pack can help you with your sustainability initiatives!

Dear,

Sustainable entrepreneurship, with a view to our own future and that of future generations, is of great importance to us. Our detailed waste policy, is available on our website. We pay attention to environmental issues in how we conduct business and are affiliated with the BSCI (Business Social Compliance Initiative). In addition, our production facilities maintain stringent standards in the creation of all of our products, and this is summarized in our adherence to [the BSCI Code of Conduct agreement](#).

We strive to ensure that all our products are as sustainable or suitable as possible. We also encourage the recycling of materials. Materials are used to create new products. The products that cannot be recycled can be used for high-quality energy generation.

#### **Packaging materials**

We supply packaging in several different materials to properly meet your needs.

It is possible to use responsibly-sourced cardboard and paper, and even biodegradable bio-based plant sleeves and flower sleeves.
