

Certificates Koen Pack Global

The Netherlands:

The Ethical Trading Initiative (ETI) is a leading alliance of companies, trade unions and NGOs that promotes respect for workers' rights around the globe. Our vision is a world where all workers are free from exploitation and discrimination, and enjoy conditions of freedom, security and equity.

Empowering sustainable and ethical supply chains Sedex, the Supplier Ethical Data Exchange, is a not for profit membership organization dedicated to driving improvements in responsible and ethical business practices in global supply chains. The goal is a secure, online database that offers members the ability to store information, share and report on four key areas: Labour, Health & Safety, Environmental and Business Ethics. Koen Pack is connected since 2013. <http://www.sedexglobal.com>

Since January 1, 2017, Koen Pack has become a member of the BSCI program. BSCI is an initiative of the Foreign Trade Association (FTA) and stands for Business Social Compliance Initiative. The initiative was established to improve working conditions among others in the supply chain worldwide. We think equal and good working conditions for everyone are important in our supply chain. In consultation with our producers in e.g. Kenya, China, Vietnam and Myanmar, we ensure that the working condition requirements are met.

Colombia:

ISO 14001 is a standard in the field of environmental management developed by the International Organization for Standardization. Using an environmental management system according to ISO 14001, the environmental risks of the business managed and where possible reduced. ISO 14001 certification is not generally required, but there are municipalities that request them in providing an environmental permit. Larger companies, especially governments, set ISO 14001 certification in procurement is often a requirement in their applications. <http://www.icontec.org/>

Certificates Koen Pack Global

Global:

Koen Pack is a firm believer in lowering the carbon footprint of all our products, and with that, the impact on the environment. All our plastics are fully recyclable, and we are able to produce degradable plastics that are currently available in the market. We strongly prefer recycling however, since it's always better to prevent plastic from ending up in the landfills, key is to educate consumers to actually recycle all plastics. That's why we show the recycle logo on our products wherever possible. We use water based inks where possible.
